CONTENTS

- 1 A paradigm shift in the garment design industry
D. Thalmann, N. Magnenat Thalmann and G. Lapeere
- 27 Using artificial intelligence techniques in production management
J. Zhang
- 37 Integration and manufacturing strategy
J. Zhang
- 41 A system approach to production management
D. Thalmann and G. Lapeere
- 49 Model-based production management
H. Zhou, W. Straßer and G. Lapeere
- 79 Production management systems for semiconductor fabrication
J. Zhang
- 89 Flexible models and methods for an integrated production management system
D. Thalmann, H. Zhou and J. Zhang
- 99 Computer-aided production management in CIM
H. Zhou and G. Lapeere
- 109 The implementation of production management in CIM systems
J. Zhang
- 119 An integrated approach to the garment production industry
D. Thalmann and G. Lapeere
- 129 Production scheduling in semiconductor manufacturing
J. Zhang
- 139 Design technology and its relation with CIM
H. Zhou, W. Straßer and G. Lapeere
- 149 A hybrid system of manufacturing systems planning and production management
H. Zhou and G. Lapeere
- 159 Flexible layout: evolution, consequences and computer-aided design
G. Lapeere

Volume 19, No. 3, May 1992

Contents by Computer Graphics

- 161 Foreword
- 163 Editorial
- 165 A 3D/2D approach to animation
H. Zhou and G. Lapeere
- 175 A uniform approach to geometric objects in efficient computer graphics
D. Thalmann, H. Zhou, G. Lapeere and G. Lapeere
- 185 Three-dimensional garment design and animation: a new design tool for the garment industry
D. Thalmann, N. Magnenat Thalmann and G. Lapeere
- 195 Efficient design of cyclides for CAD
H. Zhou and G. Lapeere
